

Cybersecurity Strategy

This document outlines the organization's cybersecurity strategy aligned with its overall business objectives.

The organization ensures that cybersecurity is integrated into all business processes and decision-making.

Key elements of the strategy include:

- Alignment with organizational goals and objectives
- Risk management and risk assessment procedures
- Data protection and privacy controls
- Continuous monitoring and improvement
- Incident response and recovery planning

The strategy is reviewed annually and updated based on emerging threats and organizational changes.

The organization maintains a clear cybersecurity governance structure to support implementation and accountability.
